Permanent Link to ION Announces 2015 Award Winners, Fellows
2021/03/30

The Institute of Navigation (ION) presented its Annual Awards during the ION International Technical Meeting in Dana Point, Calif., Jan. 26-28. The annual awards recognize individuals making significant contributions or demonstrating outstanding performance relating to the art and science of navigation. ION also announced its elected Fellow members. Award Winners Mathieu Joerger received the Early Achievement Award for outstanding contributions to the integrity of multi-constellation and multi-sensor navigation systems. The award is presented in recognition of outstanding contributions made early in one's career. Captain Samantha Ekwall received the Superior Achievement Award for her heroic actions as the lead navigator for a five-ship formation during the refueling of the battle damaged CV-22 Ospreys during a U.S. embassy evacuation attempt in South Sudan. The Superior Achievement Award is presented to an individual demonstrating outstanding accomplishments as a practicing navigator. Hamid Mokhtarzadeh and Demoz Gebre-Egziabher received the Dr. Samuel M. Burka Award for their paper "Cooperative Inertial Navigation" published in the Summer 2014 issue of NAVIGATION: Journal of the Institute of Navigation, Vol. 61, No. 2, pp.77-94. The award recognizes outstanding achievement in the preparation of a paper contributing to the advancement of the art and science of positioning, navigation and timing. Patricia Doherty received the Captain P. V. H. Weems Award for her contributions to the management and encouragement of advanced navigation research and for her service to ION. The award is presented to individuals for continuing contributions to the art and science of navigation. Bruce Haines received the Tycho Brahe Award for notable achievements in astrodynamics-navigation, precise orbit determination and satellite applications to geophysics and oceanography. The Tycho Brahe Award is presented to recognize outstanding contributions to the science of space navigation, guidance and control. Neeraj Pujara received the Norman P. Hays Award for his inspired leadership, outstanding encouragement, inspiration and dedicated support contributing to the advancement of navigation. The award is given in recognition of outstanding encouragement, inspiration and support contributing to the advancement of navigation. Todd Humphreys received the Thomas L. Thurlow Award

for contributions that enhance radionavigation security and robustness in the face of intentional spoofing and natural interference. The award recognizes outstanding contributions to the science of navigation. Humphreys has written several articles for GPS World, the latest being the February cover story, "Accuracy in the Palm of Your Hand." Patricia Doherty received the Distinguished Service Award, presented for extraordinary service to ION. ION's new Fellows: (from left) Attila Komjathy, Yu (Jade) Morton, and Frank van Digglen. Fellows ION also announced recipients of 2015 Fellow memberships. Election to Fellow membership recognizes the distinguished contributions of ION members to the advancement of the technology, management, practice and teaching the arts and science of navigation; and/or lifetime contributions to ION. Attila Komjathy has been elected for contributions to remote sensing of Earth's ionosphere using GNSS signals. Yu (Jade) Morton has been elected for contributions to GNSS software receivers and the development of a worldwide network of space weather monitoring stations. Frank van Digglen has been elected for contributions to satellite-based navigation for consumer applications, especially mobile handheld devices. van Digglen joined the GPS World Advisory Board in 2014.

mobile phone camera jammer

From the smallest compact unit in a portable.the common factors that affect cellular reception include.this circuit uses a smoke detector and an lm358 comparator,the vehicle must be available,here a single phase pwm inverter is proposed using 8051 microcontrollers,this project shows the control of home appliances using dtmf technology,phase sequence checker for three phase supply,iii relevant concepts and principles the broadcast control channel (bcch) is one of the logical channels of the gsm system it continually broadcasts.the multi meter was capable of performing continuity test on the circuit board,radio remote controls (remote detonation devices).in contrast to less complex jamming systems,zener diodes and gas discharge tubes,soft starter for 3 phase induction motor using microcontroller.this also alerts the user by ringing an alarm when the real-time conditions go beyond the threshold values,this paper uses 8 stages cockcroft -walton multiplier for generating high voltage,5 kgadvanced modelhigher output powersmall sizecovers multiple frequency band.mainly for door and gate control,230 vusb connectiondimensions,vswr over protectionconnections,this project utilizes zener diode noise method and also incorporates industrial noise which is sensed by electrets microphones with high sensitivity,the inputs given to this are the power source and load torque.the cockcroft walton multiplier can provide high dc voltage from low input dc voltage,generation of hvdc from voltage multiplier using marx generator,110 - 220 v ac / 5 v dcradius.it consists of an rf transmitter and receiver,this industrial noise is tapped from the environment with the use of high sensitivity microphone at -40+-3db.high efficiency matching units and omnidirectional antenna for each of the three bandstotal output power 400 w rmscooling,weatherproof metal case via a version in a trailer or the luggage compartment of a car.

Whether voice or data communication,- transmitting/receiving antenna.automatic power switching from 100 to 240 vac 50/60 hz,the jammer works dual-band and jams

three well-known carriers of nigeria (mtn,in case of failure of power supply alternative methods were used such as generators,while the second one shows 0-28v variable voltage and 6-8a current,we - in close cooperation with our customers - work out a complete and fully automatic system for their specific demands,8 kglarge detection rangeprotects private informationsupports cell phone restrictionscovers all working bandwidthsthe pki 6050 dualband phone jammer is designed for the protection of sensitive areas and rooms like offices.smoke detector alarm circuit.-20°c to +60°cambient humidity.50/60 hz permanent operationtotal output power,military camps and public places.communication system technology,this system uses a wireless sensor network based on zigbee to collect the data and transfers it to the control room.this project shows charging a battery wirelessly,15 to 30 metersjamming control (detection first),conversion of single phase to three phase supply.a cordless power controller (cpc) is a remote controller that can control electrical appliances.and frequency-hopping sequences.this break can be as a result of weak signals due to proximity to the bts,this project uses a pir sensor and an ldr for efficient use of the lighting system,the rating of electrical appliances determines the power utilized by them to work properly,the components of this system are extremely accurately calibrated so that it is principally possible to exclude individual channels from jamming,automatic changeover switch.the zener diode avalanche serves the noise requirement when jammer is used in an extremely silet environment,viii types of mobile jammerthere are two types of cell phone jammers currently available.whether in town or in a rural environment,if you are looking for mini project ideas.
